

FLYING FROG FARM'S 2011 ADDITIONAL LIST:

EXPLANATIONS OF ABBREVIATIONS: Following the cultivar name is an abbreviation for size, color pattern and then flower color. Size considers the *mature height* under great growing conditions. XL=over 30 inches L=23-30inches M=12-23 inches S=6-12 inches mini=0-6 inches

Leaf color is next---var stands for variegated; str is used to identify streaky variegation. Flower color is next. O.S. =originator stock. We continue to grow mostly tissue-cultured plants, as we can maintain adequate numbers of plants and it allows us to bring production to market at a reasonable price. Tissue-culture aids in providing disease free plants as our suppliers are continually testing and our farm is inspected regularly.

*indicates plants known to tolerate considerable sunlight; morning sun is good ,late afternoon sun is okay, but try to avoid the hot midday sun. Adequate moisture can help some adjust.

******many of these cultivars are in limited supply, so please don't be too disappointed if we run out!*

*Abba Dew L-var-Lav Sun Power sport—light green center—wide yellow margin.	\$15
Abba Iresistable M-var-Lav Creamy leaves dramatically accented with margins of deep blue and dark green.	\$17
Abby S-var-Lav Rapid growing sport of Gold Drop—leaves have gold margins and green centers.	\$8
