

**“Sunshine and flowers to while away the hours.” AUTHOR UNKNOWN**

\*\*\*\*\*

**EXPLANATIONS OF ABBREVIATIONS:** Following the cultivar name is an abbreviation for size, color pattern and then flower color. Size considers the *mature height* under great growing conditions. XL=over 30 inches L=23-30inches M=12-23 inches S=6-12 inches mini=0-6 inches

Leaf color is next---var stands for variegated; str is used to identify streaky variegation. Flower color is next. O.S. =originator stock. We continue to grow mostly tissue-cultured plants, as we can maintain adequate numbers of plants and it allows us to bring production to market at a reasonable price. Tissue-culture aids in providing disease free plants as our suppliers are continually testing and our farm is inspected regularly.

**\*\*starred items are new plants for us and they will be smaller in size**

**\*indicates plants known to tolerate considerable sunlight; morning sun is good ,late afternoon sun is okay, but try to avoid the hot midday sun. Adequate moisture can help some adjust.**

**----<http://hostalibrary.org> IS A GREAT SITE TO VISIT TO SEE PICTURES OF HOSTAS!**

<b>A Many Splendored Thing</b> L-var-Lav	Very large leaves with a dark green center and a very wide greenish-yellow margin—corrugated!	\$13
